TRUCK / BUS DRIVING CAB

- Genuine, OEM truck components including: Steering column and hand controls, pedals, shifter, emergency brake, dashboard, air ride seat, cab and trailer brake and more
- LCD instrument cluster adapted to different simulated vehicles
- Motion platform for both pitch and roll
- Automatic, synchronized and non-synchronized transmissions
- Can be tailored for international installations with right or left hand driving, multiple languages and road markings

COMPREHENSIVE TRAINING SOFTWARE

- Easy to use software interface
- Hazard perception module trains drivers to identify and anticipate risky situations (pedestrians, animals, emergency braking, safety distance, etc.)
- Adverse weather conditions
- Large virtual world including highway, country roads, driving range, and city
- High-fidelity vehicle dynamics modeling ensures the simulated vehicle mimics the handling of a actual truck or bus
- Instrument clusters can be customized upon request
- Multi-view instant replay allows instructors to review the drivers performance
- Photo-textured graphics deliver a realistic driving environment
